

MODELS AND LEGO MODELS: (choose one to exhibit)

- Make one snap-together plastic model. Do not glue or paint your model.
- Make a model using 2 to 4 different items of your choice. Examples: clay, toothpicks, sticks, ceramics, sugar cubes, etc.
- Visit a museum and look around at different models. Write a short report on your visit. Here are some things you might want to put in your report:
 1. What kind of models did you see?
 2. Ask someone who works at the museum how they build their models. Or do they buy the models already built?
 3. What was your favorite model? Why did you like this model? How big was it? How big would the real-life item be?
- Make a model using as many different items of your choice. Make a model background to display your model. Example: Paint a shoebox so that a plastic model car looks like it is driving down the road, across a field, through the water or the air.
- Make a model using any type of Legos, Keep it simple and no larger than 10" X 10". Please Note: The use of the word "Lego" is used only as a guide for the project. You are free to use any brand of plastic snap-together or connecting pieces to complete your project.

Look at the current year project guidelines for exhibit due dates and locations.
