1. The two types of injections given to cattle include the _____ injection and _____ injection.
2. Cattle have a four compartment stomach. The four parts are _____, _____, _____ and _____.
3. A livestock feed label should contain eight different items. Fill in the missing items.

A. _____ B. <u>Purpose of Feed</u> C. _____ D. _____	E. _____ F. _____ G. <u>Name/Address of Distributor</u> H. _____
---	---
4. Learning how to give an injection is an important skill. Needles are similar to wire in that they are sized by gauge. The smaller the number (12 or 14 gauge), the larger the needle. The larger the number (20 or 22 gauge), the smaller the needle.

 What size needle would you use for a normal injection? Circle the best answer.
 - A. Plastic syringe, 12 gauge needle, 1 ¼ inches long
 - B. Plastic syringe, 16 – 18 gauge needle, 1 ¼ inches long
 - C. Plastic syringe, 22 gauge needle, 1 ¼ inches long
5. Using your “Beef Resource Handbook” 4-H 117R, look up web resources for the following:

<u>Breed Association</u>	<u>Web Site</u>
North American Limousin Foundation	_____
American Hereford Association	_____
American Shorthorn Association	_____
6. Minerals needed in small amounts are called _____.
 Examples of these are calcium and phosphorus.

Answers to these questions can be found in the “Beef Resource Handbook” 4-H 117R
