

# Invasive Management Cooperative Of Morgan County

With numerous invasive plants, animals, and insects already established in Morgan County, the Invasive Management Cooperative of Morgan County was recently formed to educate, identify, and respond appropriately to invasive concerns. We welcome you to attend any of our free monthly educational events so you can learn to identify potentially invasive species, or join us as we actively “seek and destroy” invasive species on public properties throughout Morgan County, Indiana.

We meet the first Tuesday of each month at the Morgan County Administration Building, 180 S. Main Street, Martinsville, IN at 6:00 PM. We look forward to “Pulling Together” with you!

For more information, please visit Morgan County Soil and Water Conservation Districts website at
