TIMBER MANAGEMENT & INVESTMENT ISSUES

Manage your woodland for health, vigor, and value. Lenny Farlee, Extension Forester with Purdue University, will provide information on managing your woodland to meet your personal goals and enhance the health, productivity, and value of your property. We will cover some basic “how-to” of woodland management, marketing timber, and finding resources and assistance to help you achieve your property objectives. A little bit of management can go a long way towards enhancing the health of your forest and providing the benefits you are looking for.

This event is free, but please RSVP if you're planning to attend. Light refreshments will be served. If you have any dietary or physical special needs, let us know. We try our best to reasonably accommodate.
