State Forests of Indiana

The state forests of Indiana are nature preserves that are home to many species of plants and animals. These large forests total up to 1,043,000 acres of woodland. Below, I have created a diagram of the state forests of Indiana and interesting facts about each.

Frances Slocum State Forest
Fishing, hiking, swimming, and skiing are featured in this quiet, secluded state forest.

Owen-Putnam State Forest
State wildlife park offering areas for camping, hunting, fishing, horseback riding and more.

Morgan-Monroe State Forest
Over 24,000 acres, this hardwood forest offers camping, hiking, hunting, fishing and beautiful scenery.

Greene Sullivan State Forest
With fishing, camping, hunting, hiking, and many cabins available, this forest is an exquisite place to be.

Martin State Forest
Forested over 7000+ acres with hiking/biking trails, 3 fishing sites, a carriage/road, and picnic areas.

Ferdinand State Forest
Beautiful forest with hiking, hunting, fishing, swimming, camping, and skating available.

Jackson-Washington State Forest
Forest park for camping, fishing, hunting, and archery, plus trails for hiking, biking, and horse riding.

Selmier State Forest
This spacious hardwood forest offers golfing, swimming, backpacking, hiking, and camping.

Yellowwood State Forest
Pine forest with a lake offers camping, fishing, hunting, hiking, and golf playing. (Seasonal recreation)

Salamonie River State Forest
Fishing, horseback riding, fishing, and camping are offered in an 800-acre preserve with timber woodlands.

* All forests in the state are all different, but they each are home to over 800 species of animals and plants. Also they each have over 100 species of trees. Yes, forests are extremely beneficial to all the ecosystems.
